CLAIMS 1-81 ARE PRESENTED FOR EXAMINATION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-51 and 67-81, drawn to a method ameliorating one or more symptoms of atherosclerosis and repair of tissue damage associated with atherosclerosis;
- II. Claims 57-66, drawn to kits classified in class 435 subclass 975 and/or subclass 810; and
- III. Claims 52-56, drawn to pharmaceutical compositions classified throughout class 514..

Inventions of Group I and III are related as process (method) and apparatus (compositions) for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case related compositions of Group III can be used to treat cancer.

Inventions of Groups I, II and III are separate and distinct since they have acquired a separate status in the pharmaceutical art as evidenced by their separate classification. A search of the prior art and the pharmaceutical literature would cause an undue burden on the examiner.

Art Unit: 1617

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Further restriction may be required.
